Technical Fact Sheet

NAME:

BLAZIN' GLAZE CLEAR COAT PROTECTANT (HP-119)

DESCRIPTION:

A concentrated liquid rinse wax designed for sealing wax finishes in industrial car washing installations. It works well in tunnel applications as well as power washers, and now it's concentrated for easy use.

BENEFITS:

Effective: Hydrophobic Agents (water repellents) plate out on the metal surfaces of the car to seal out water, weather, salt, and dirt and protect your car's finish.

Substantive Surfactants: This system of low foaming, conditioning surfactants ensures a smooth even controlled deposition of sealant on the car's surface.

Concentrated: This formula is highly concentrated so it seals more cars than ever before. Now just one five gallon carboy of Blazin' Glaze seals more than 2,500 cars.

Glass Protection: This product contains no silicone and is not substantive to glass. It won't smear on windows.

PACKAGING:

A 5-gallon plastic carboy.

DILUTION:

Direct Feed: Apply 1/8 to 1/4 ounces (Approx. 3-7ml.) of product per vehicle.

NOTE: Consult your local Turtle Wax distributor for complete information on the wide range of dilution options for this product. Actual dilution or chemical usage may vary based on desired results.

SPECIFICATIONS:

Appearance:	Clear, reddish-orange, thin liquid
Fragrance:	Orange Citrus
Density:	7.33 Lbs. /gal.
Emulsifier:	Cationic
DOT Labeling:	None (Non-Hazardous)
