

Technical Fact Sheet

NAME: WALL & EQUIPMENT CLEANER (HP-590)

DESCRIPTION: Industrial strength acid cleaner which contains no hydrofluoric acid thus making it much less hazardous to work with than other acid cleaners and is completely safe on all glass and plastic surfaces.

FEATURES:

- HP-590's multiple uses include lime and scale removal and chrome cleaning among many others.
- HP-590 is Safe to use on most surfaces and is non-corrosive to aluminium.

PACKAGING:

A 5-gallon plastic carboy.
A 55-gallon closed-head, plastic drum.

APPLICATION:

- For optimum results, HP-590 should be sprayed, preferably with a weed type sprayer under low pressure, on the surface to be cleaned.
- HP-590 can be used at full strength for difficult jobs, and can be diluted down to 1 part HP-590 to 10 – 25 parts water and allowed to remain on the surface being cleaned as long as possible.
- For heavier build-ups, HP-590 may be brushed on, agitated and then rinsed with high pressure water after sufficient dwell time.

SPECIFICATIONS:

Appearance:	Colorless
Fragrance:	Pungent
pH:	<1.5
